

LIFE CALLIOPE LIFE17 NAT/IT/000565 - “Coastal dune habitats, sublittoral sandbanks, marine reefs: conservation, protection, and threats mitigation”

Life Calliope LIFE17 NAT/IT/000565
Coastal dune habitats, sublittoral sandbanks,
marine reefs: conservation, protection, and
threats mitigation.

Soggetto capofila
REGIONE ABRUZZO

Partner
Università degli Studi del Molise
CIRSPE Centro Italiano Ricerche e Studi per la
Pesca
Frederick University
Department of Environment of Cyprus

Il progetto LIFE NAT/IT/000565 CALLIOPE ha come
obiettivo la protezione degli habitat dunali costieri e
sublitoranei di interesse comunitario (Direttiva 92/43/
CEE) situati nella Regione Abruzzo e nella costa nord-
occidentale di Cipro. Tali ambienti sono soggetti agli
effetti diretti e indiretti delle attività antropiche e quindi
il loro stato di conservazione è critico.

Azione A1 - Sistema Informativo Integrato

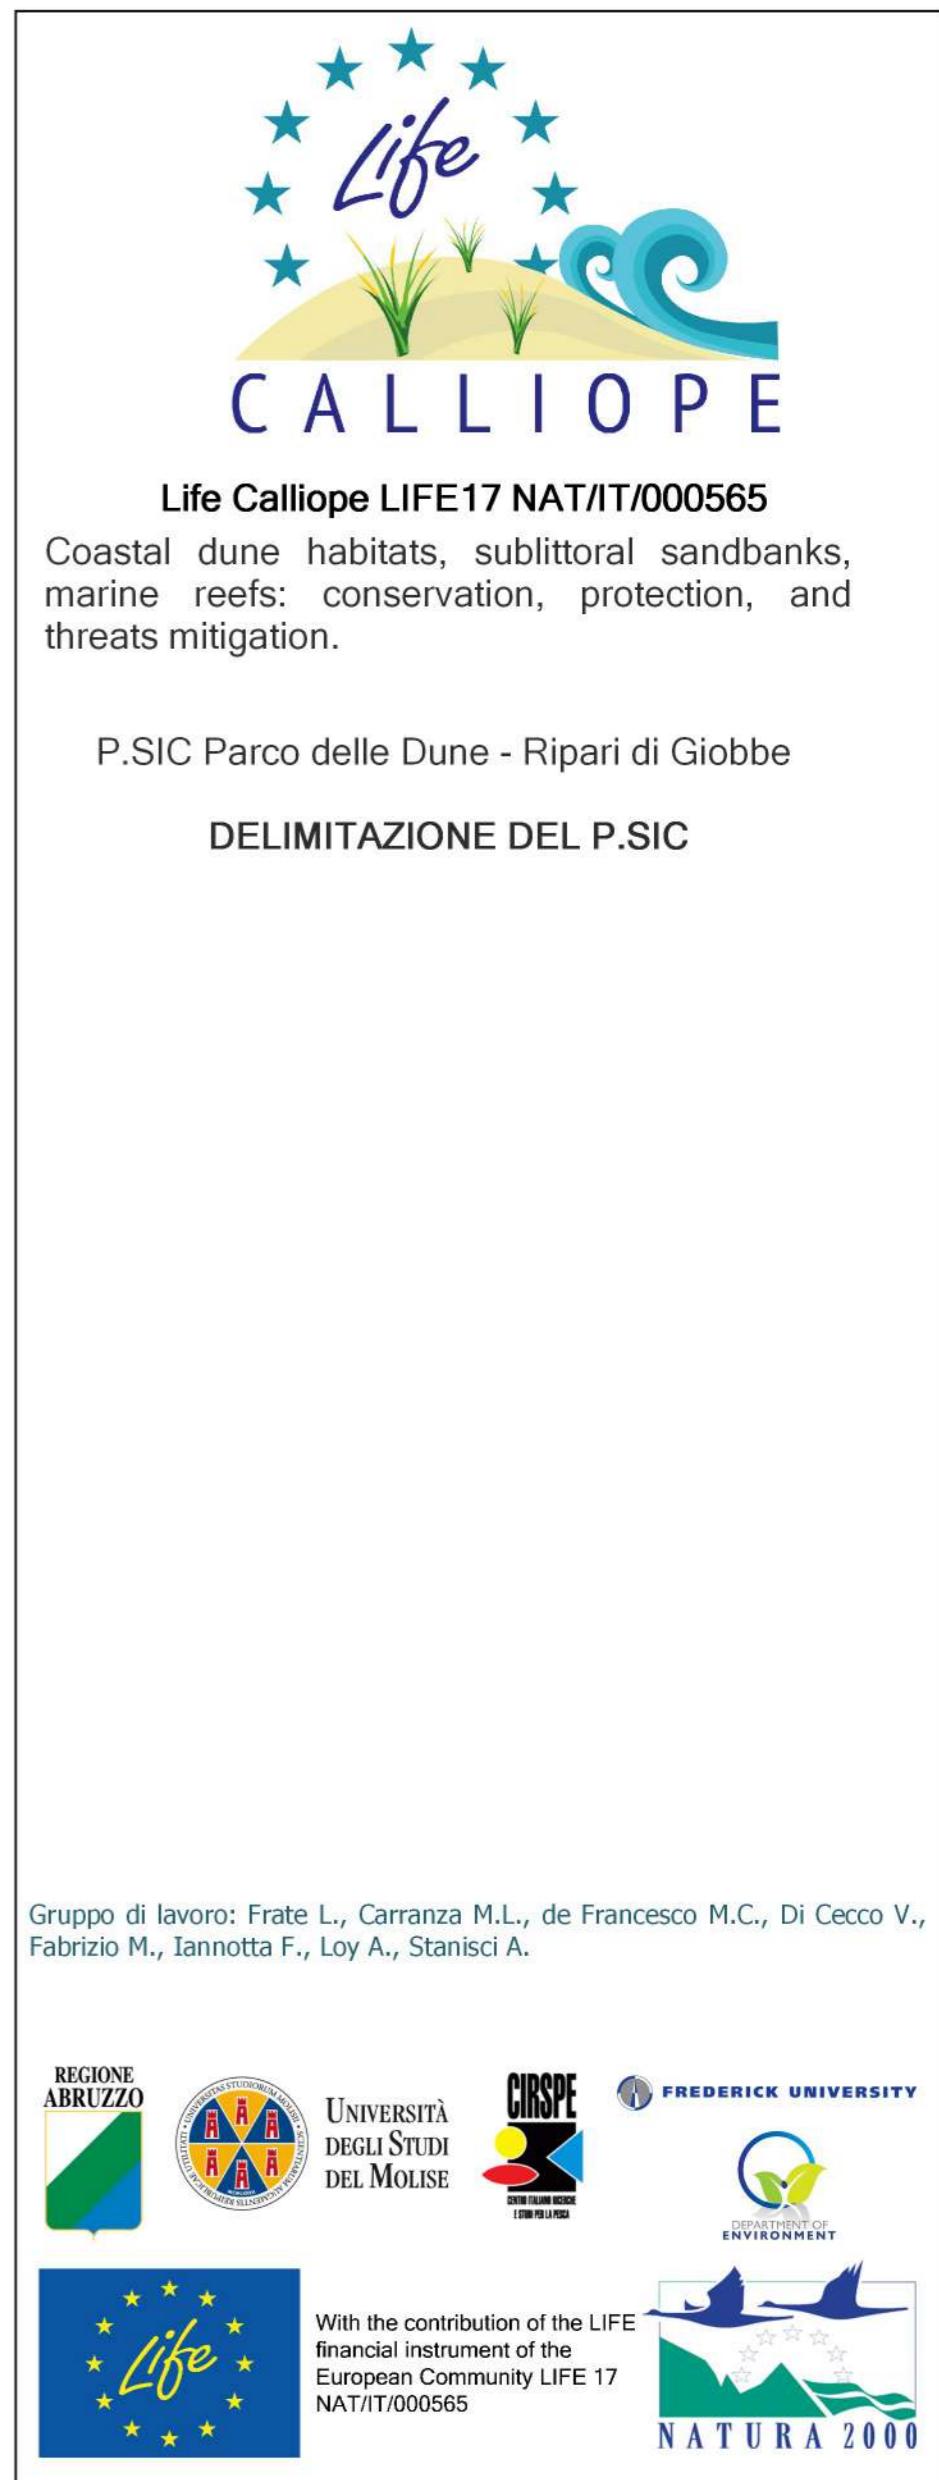

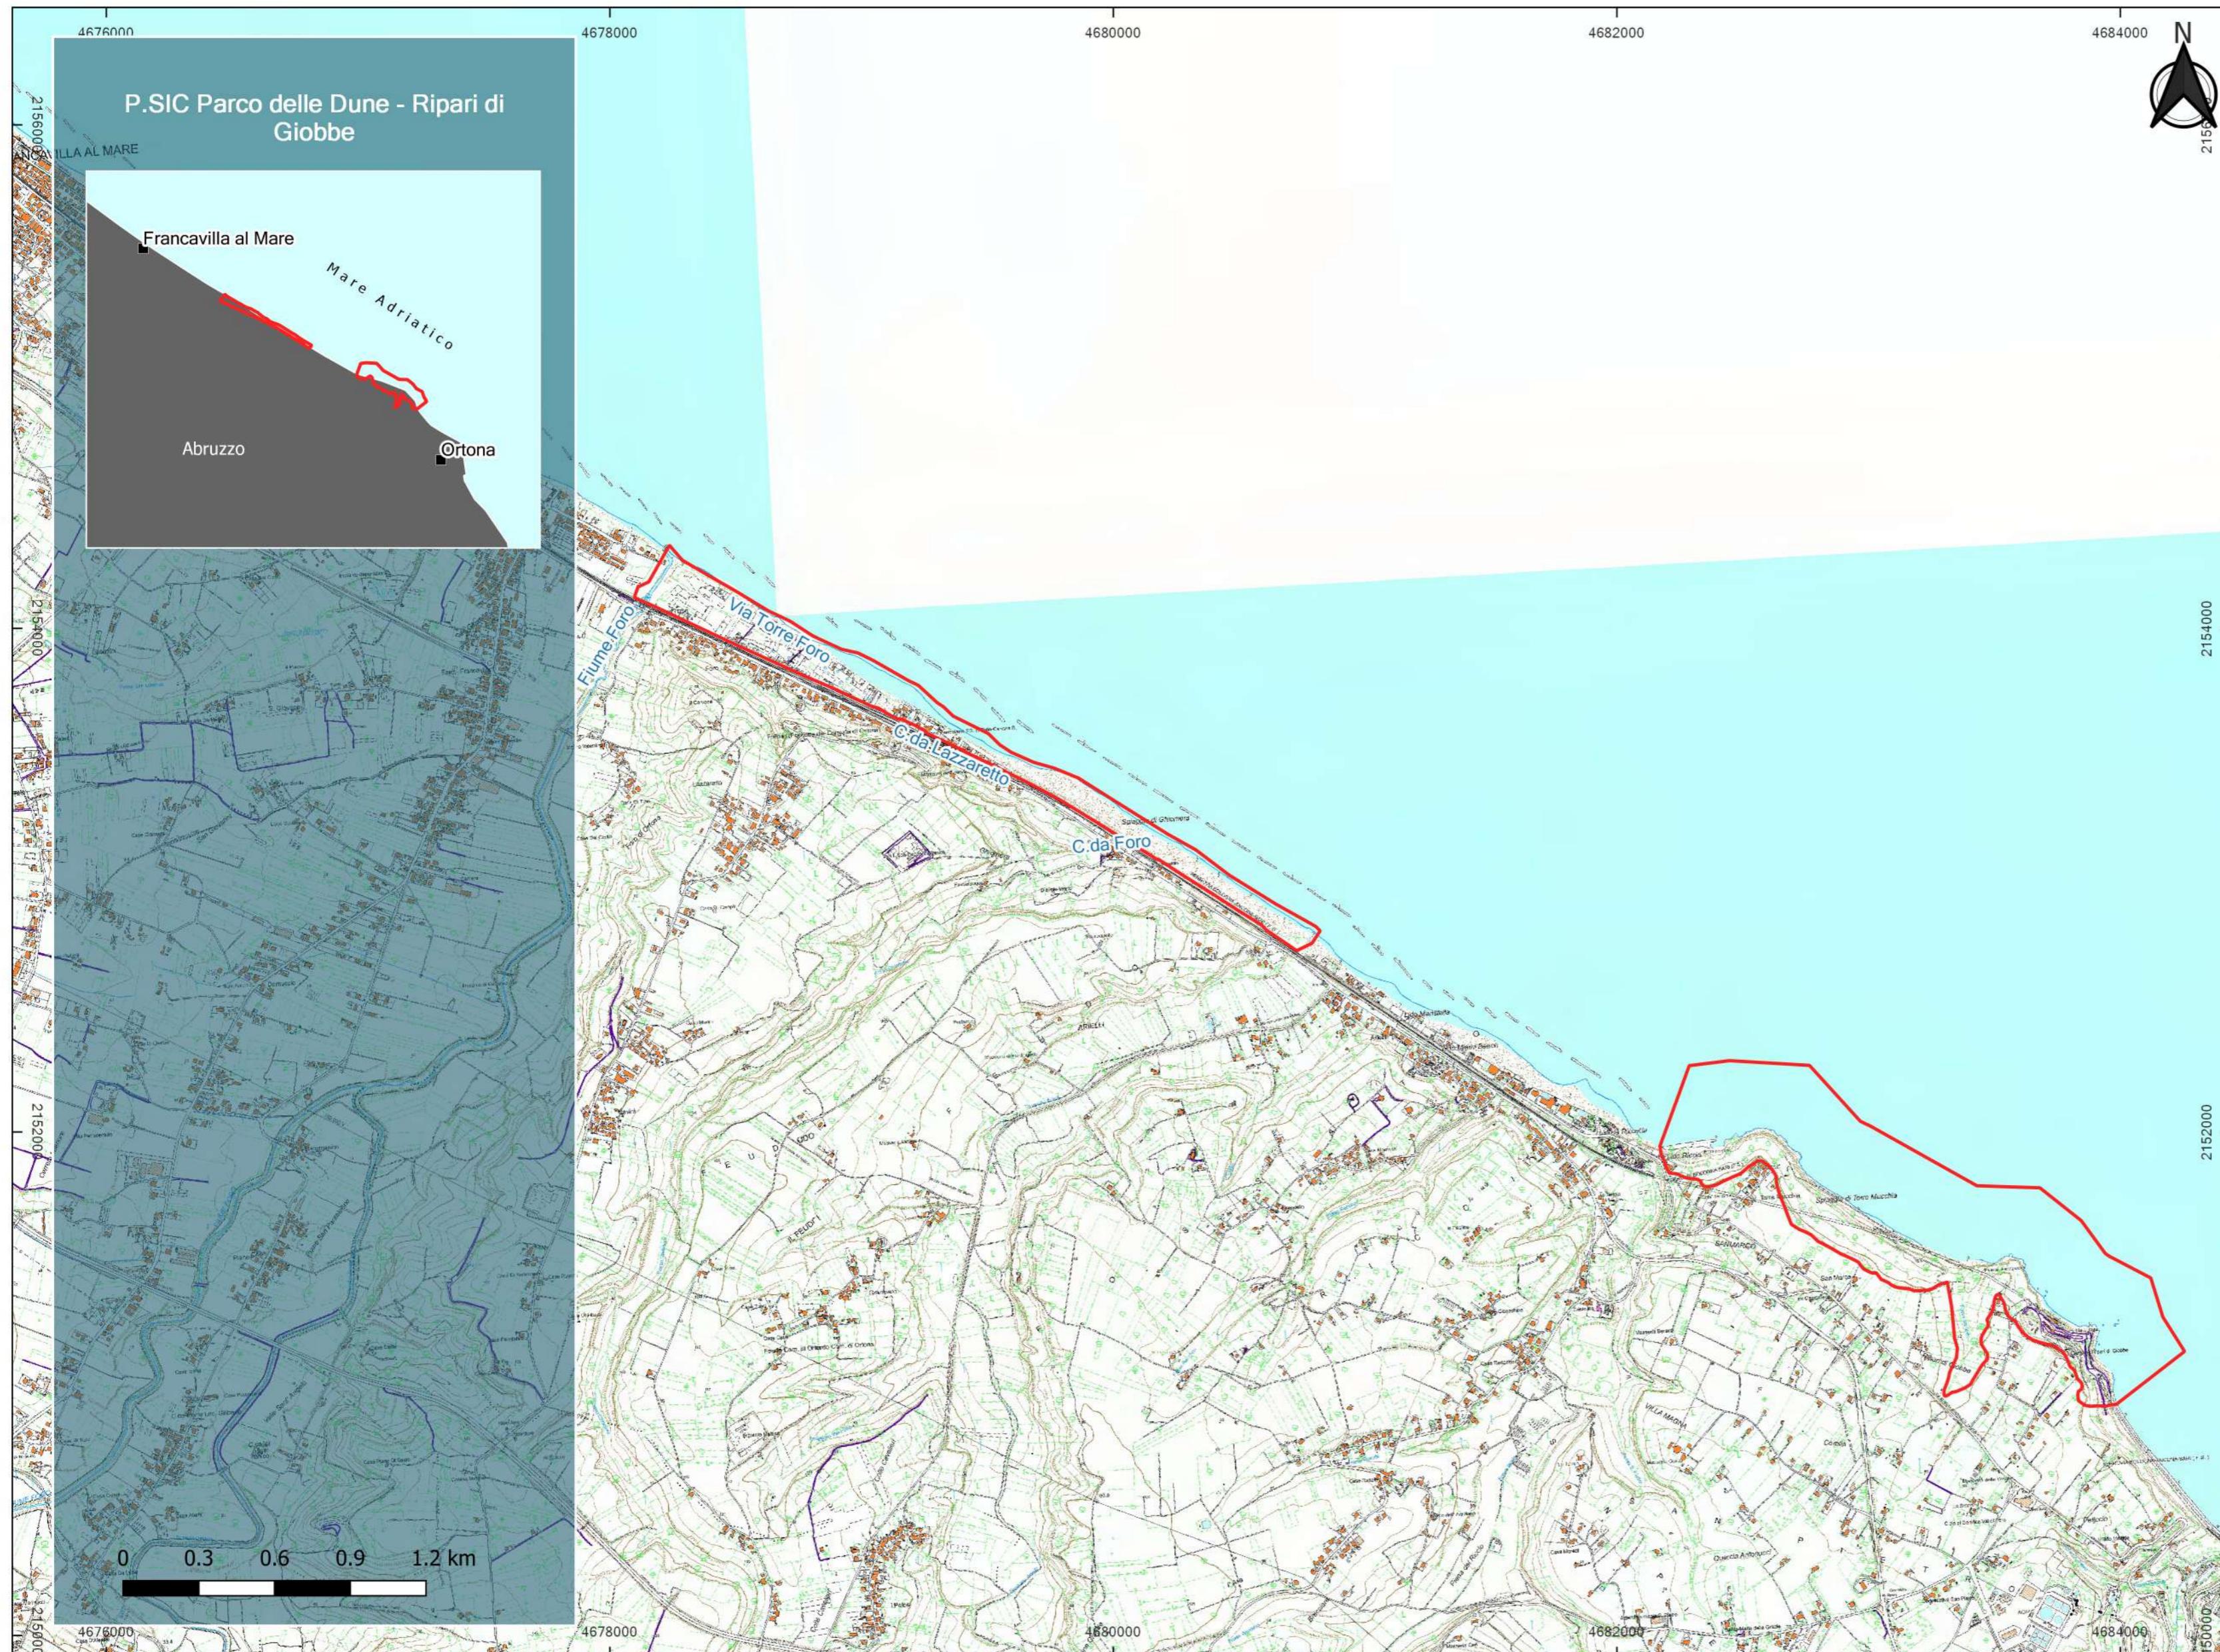

L’Azione A1 prevede lo svolgimento di studi preliminari
e la realizzazione di un Sistema Informativo Territoriale
Integrato per valutare e monitorare lo stato di
conservazione degli habitat terrestri e marini e delle
specie target, sotto la responsabilità del Dipartimento
di Bioscienze e Territorio dell’Università degli studi del
Molise.

Gruppo di lavoro: Frate L., Carranza M.L., de
Francesco M.C., Di Cecco V., Fabrizio M., Iannotta F.,
Loy A., Stanisci A.
